

Not Safe

*Keep away from
this PTO shaft*

*PTO shaft is bad
angle at joint*
Text

*Bad for tiller
to lean back*

Keep tiller brackets vertical

TYTAN

***Vertical
Is best***

***Level or
Forward is
best***

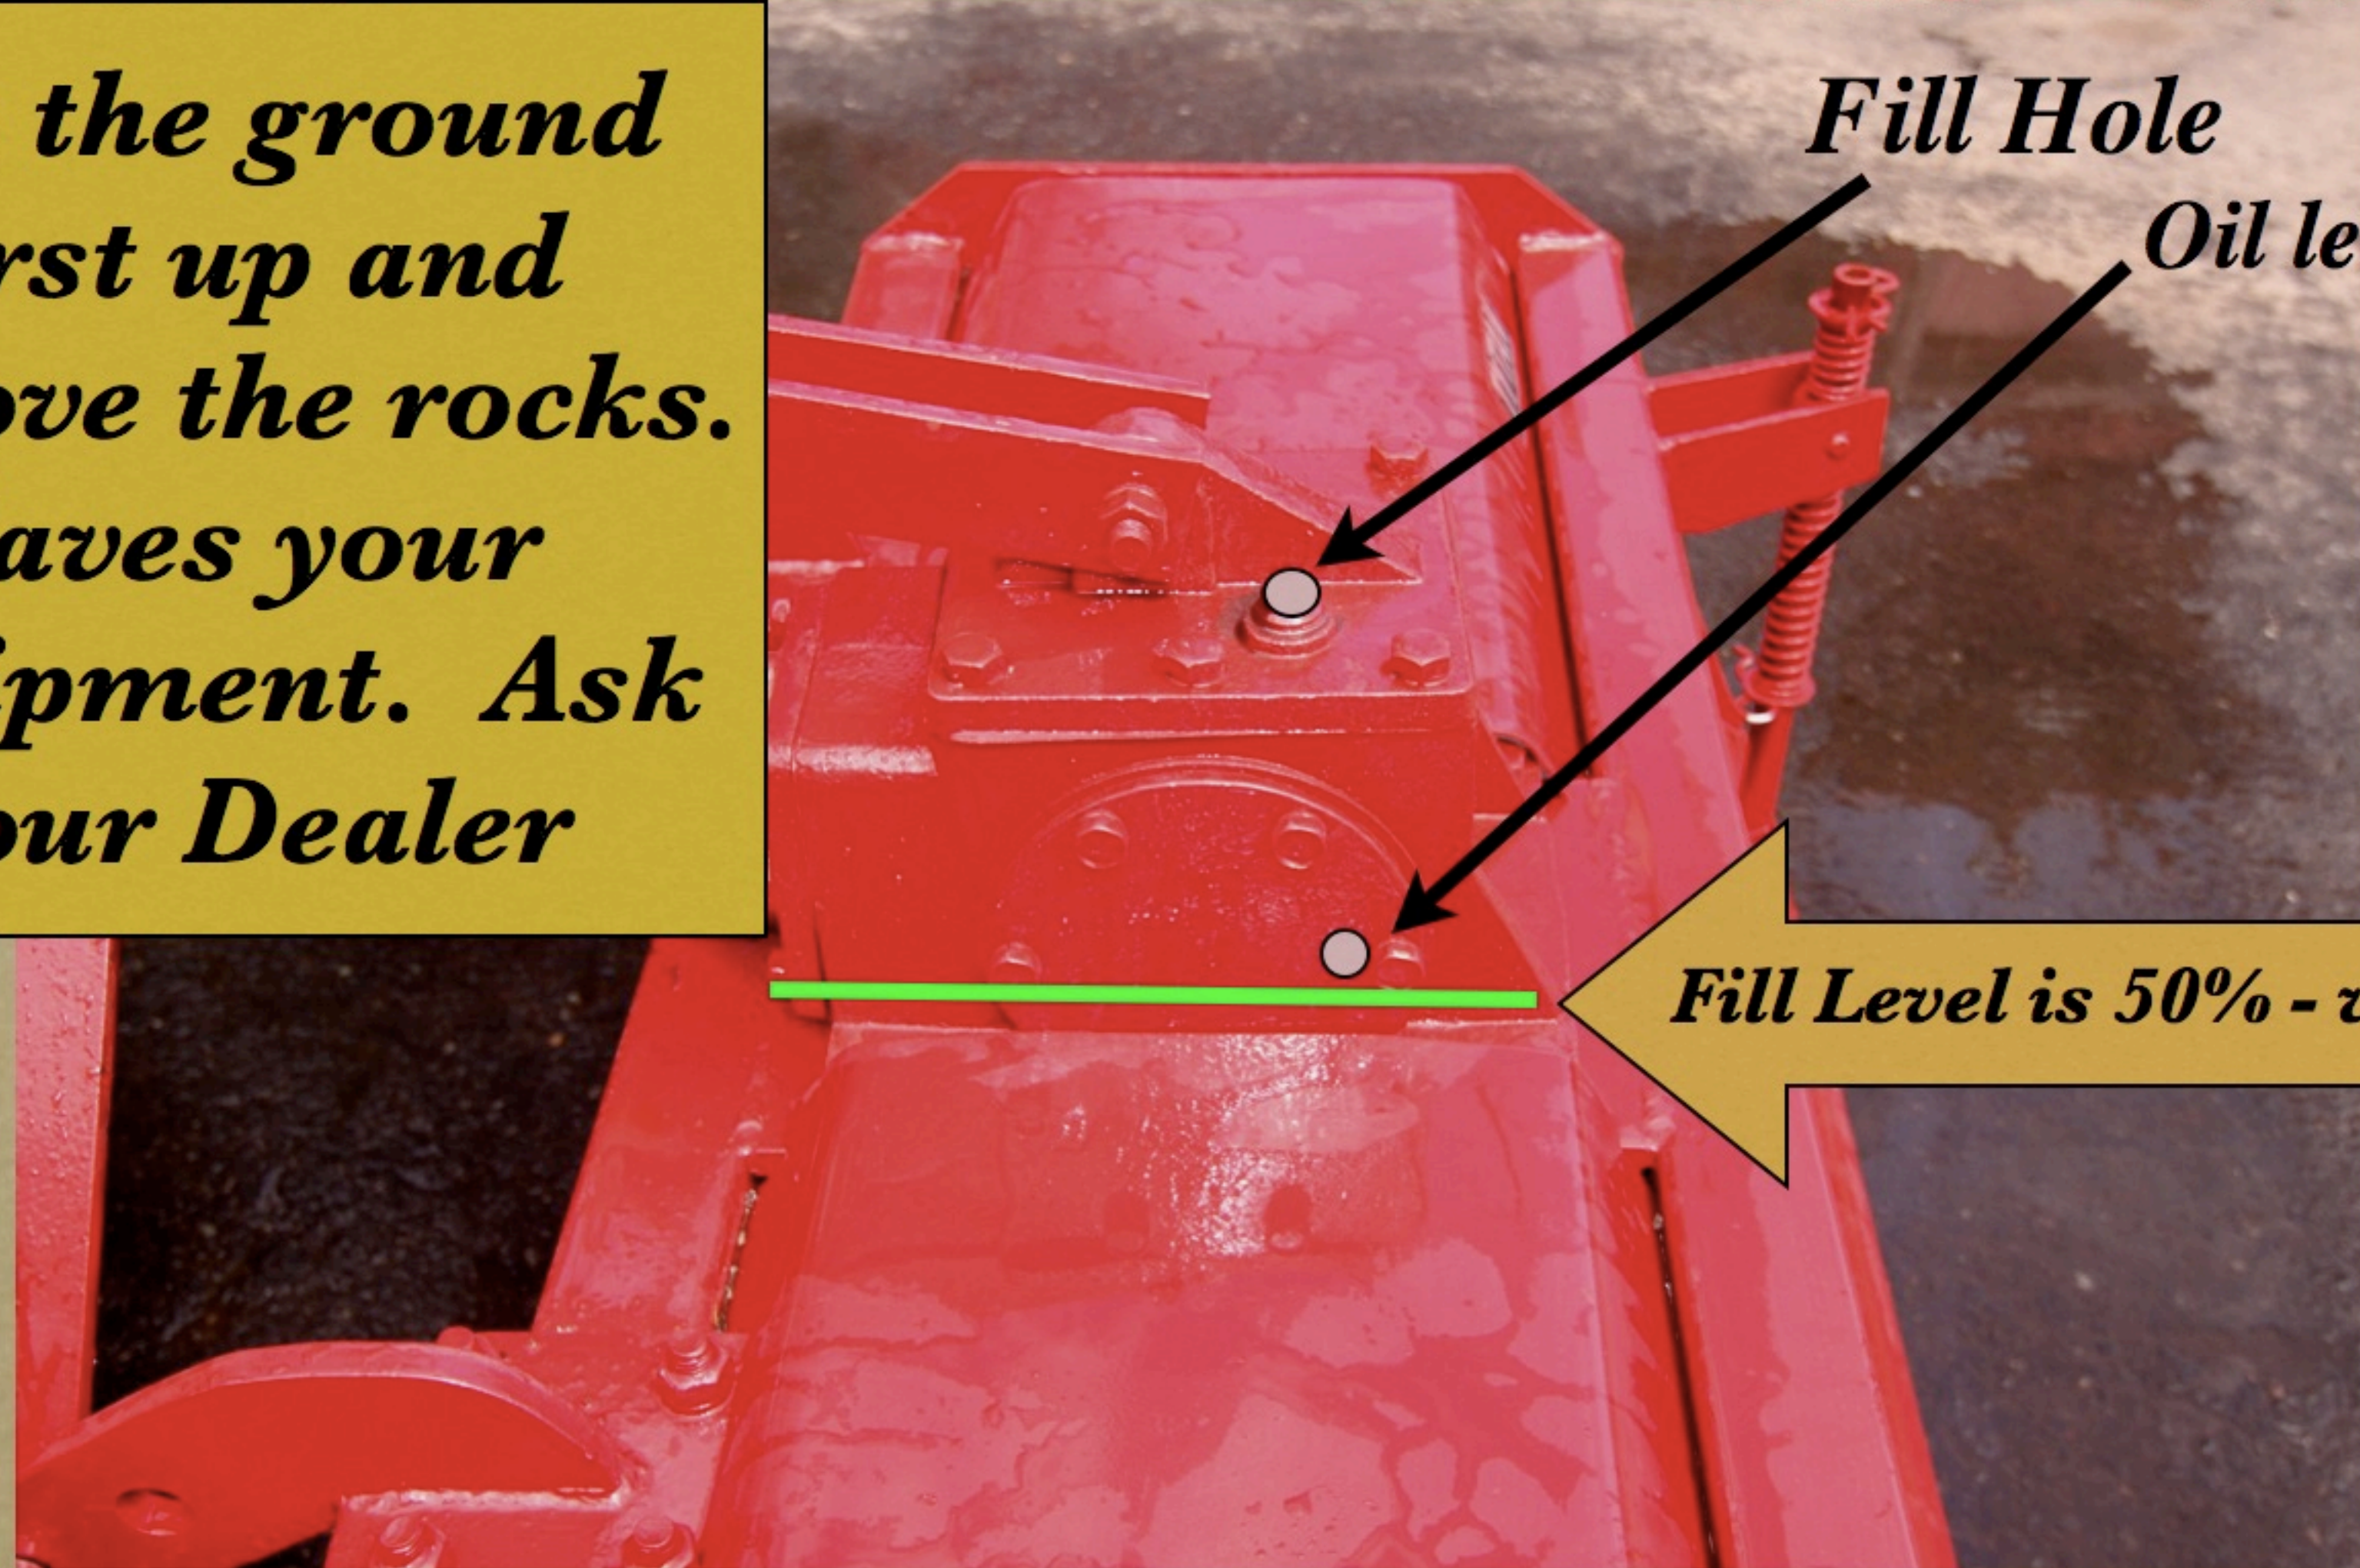

Acceptable Set Up

- ***BEST is slightly forward & PTO shaft angle still safe when in raised position***

Do NOT Over fill

Rip the ground first up and remove the rocks. Saves your equipment. Ask your Dealer

Fill Level is 50% - with 80-90 W Gear oil
